This window appears

Click check and select the pages you need reported on. Click  $\underline{c}\text{heck}$  and this report is generated

## SEO in Expression Web

Now you can go through the report page by page and adjust or add the necessary information as needed.

For more help right click the item and a drop down box appears.

This gives you more details on each problem and sends you to the help screens by clicking Learn more

You may choose to ignore some of the ideas such as renaming the index page but unique names and names that reflex the content of each page are defiantly a winner.
